

Making Cerner Millennium work for your Trust

Premier IT is approved by the London Programme for IT (LPfIT) and BT to provide experienced, professional IT trainers to assist NHS Trusts with their Cerner Millennium training deployments.

What training can we offer your Trust?

With Cerner Millennium deployed across your Trust, it is essential that staff are fully conversant with the software that they will be using on a daily basis.

We provide NHS accredited trainers who can be contracted on either a long term basis, to supplement your in-house team, or as interim cover for sickness and holidays.

Our trainers join the team in advance of the Cerner Millennium training roll-out to ensure that:

- newly designed processes are incorporated into training materials
- all training materials are customised to reflect up to date Trust processes and procedures
- the training environment is populated with relevant data to ensure that “real world” scenarios make learning meaningful and relevant
- end user training is delivered in a series of classroom-based scenarios within a predefined schedule

These trainers have specific knowledge to assist in areas such as Outpatients, Inpatients, A&E, Maternity and Theatres. The trainers are based at your premises to enable them to fully immerse themselves in your culture, understand your Trust training policies and procedures and to ensure that they provide a quality training service that best suits your needs.

“Premier IT supplied us with a whole team of accredited Cerner trainers, who understood the pressures we were under to deliver training on a new system to all staff at the Trust. The trainers’ knowledge and delivery skills certainly contributed to the success of our training roll-out.”

Barnet and Chase Farm Hospitals NHS Trust

What else can we do?

In addition to providing Cerner Millennium trainers, we can provide:

Bespoke Cerner Millennium e-Learning

Incorporating your Trust specific processes, branding and style, using proven instructional design techniques, we produce interactive and engaging Cerner Millennium e-Learning and assessments. Perfect for staff Inductions or specific departments where an e-Learning delivery method would suit staff the most.

Floorwalkers

Premier IT’s Floorwalkers are experts in all aspects of Cerner LC1 and have provided support to end users of all levels in multiple ‘Go Live’ scenarios.

Floorwalking Manager & Co-ordination Service

In addition to the Floorwalkers, we can provide experienced Floorwalking Managers to work in conjunction with your Trust, designing the strategy, assisting with demand forecasting and overseeing the whole recruitment, training and management of the Floorwalking team. The Floorwalking Managers are fully supported by a proven on-site Co-ordination Service.

Business Transformation Consultant

Premier IT employs Cerner business consultants to analyse and manage the changes to processes that your new software deployment will bring.

Training Project Lead

Our Project Leads manage the overall training implementation on a day-to-day basis. This includes project planning in a PRINCE2® environment and managing all the critical elements such as coordinating the process mapping, developing a training implementation plan and ensuring that outputs such as lesson plans, course materials and the training environment are produced.

Want to know more...

Our NHS Cerner Millennium training services are currently being deployed across many NHS Trusts nationwide.
