

PRINCE2® and MSP™ courses to suit every level

The unique approach to project management within PRINCE2 is proven to increase stability and success, through a series of essential key processes right from initial roll-out to project conclusion.

MSP (Managing Successful Programmes) is focused at the strategic level of NHS deployments, as part of the processes and procedures making up the NPfIT Quality Management System. In accordance with Connecting for Health's guidelines, the MSP methodology has become the recognised standard in enabling the successful management of multiple NPfIT projects. MSP is the logical next-step for project managers and senior officials within the NHS.

Premier IT is proud to be helping the NHS achieve its goals more quickly and efficiently, through the provision of both accredited PRINCE2 and MSP training. Such is our success that we are now offering a series of additional courses tailored to suit the needs of all NHS project staff at every level...

The following project management courses are now available through Premier IT, exclusively for NHS Trusts...

Managing Successful Programmes - NHS Senior Management Workshop

Duration: ½ day

A half day session for senior managers who are considering introducing MSP™ into their organisation

NHS Introduction to Programme Management and MSP

Duration: 1 day

A one day course for managers new to risk management within projects and programmes

Project and Programme Management Concepts for NHS Managers

Duration: ½ day

A half day session that enables senior managers to appreciate how project and programme management methodologies can be applied to their initiatives

Managing Successful Projects with PRINCE2 – NHS Senior Management Workshop

Duration: 1 day

A one day course for managers above the level of the Project Manager who need to know about the key areas of successful project planning and delivery

NHS Introduction to Project Management

Duration: 1 day

A one day course aimed at staff below Band 5 who will be working in project teams and need to understand the principles of effective project management
